## Customer Reviews

A couple years ago, my son was diagnosed with Type 1 Diabetes. This means we have to count carbs. The hospital recommended The CalorieKing book for counting carbs, and it really is a great book. The original book is a small paperback size, with print to match. It's OK with my reading glasses, but I was overjoyed to find that they publish a larger print edition, also. This is a review of the 2014 Larger Print Edition. The Larger Print Edition isn't the LARGE print that you see in a large-print novel. But it is LARGER print, and I really appreciate it. The size of the larger print book itself is a little bigger than the regular CalorieKing edition, but it's still paperback book size. Easy to store in a purse or glove compartment or backpack. size regular print 6 7/8 " x 4 1/4 " size Larger Print 7 1/4 " x 5 1/4 " Both books are the same thickness, a shade over 1/2" CalorieKing deserves its reputation for thoroughness. The main reason you'd need updated editions of it is if you eat out a lot. It can be very difficult to estimate carbs in restaurant food. Each year's updated menus of the larger restaurant chains are welcome. But as far as grocery food, the apple and broccoli carb counts won't change from year to year, and packaged groceries will always have a label telling, among other things, how many carbs per serving. To give you an example of what a lifesaver CalorieKing is, I took a trip last year with my son, traveling by air. It was fantastic to just look in this book and total the carbs as he ordered a meal from Arby's in the airport food court. It couldn't have made it easier!

Though we use this book for carb counting, for each item you are given three values: the total calories, the total grams of fat, and the total grams of carbohydrates.
