Miniature Gardens: Design And Create Miniature Fairy Gardens, Dish Gardens, Terrariums And More—indoors And Out

Synopsis

A revealing peek into the captivating world of gardening in miniature, complete with inspiring photos and practical step-by-step instructions. A delightful, fun, and endlessly creative new trend is sweeping the gardening world: miniature gardening! With your imagination as the only limit to this infinitely customizable technique, miniature gardening showcases your individuality. Once you've learned how to design, create, and grow tiny plant combinations successfully, you'll be able to let your creativity loose indoors and out. In *Miniature Gardens*, gardening expert Katie Elzer-Peters demonstrates the latest in plant options and designs through her gorgeous color photography and laser-focused Do-It-Yourself advice. Plenty of great tips and idea-generating information on small-scale furnishings are included as well. Where other books on this popular subject offer run-of-the-mill images and only limited how-to information, *Miniature Gardens* gives you a thorough and beautiful window into this tiny world, from fairy gardening to dish gardening, terrariums, and even a miniature water garden project. From cute home tabletop designs to elaborate mini-villages and everything in between, miniature gardening is a pastime that can be enjoyed by hobbyists and families of all ages and in all sizes of living space. With *Miniature Gardens*, you're just a lightning strike of inspiration away from bringing to life the endless creations unique to your own imagination.

Customer Reviews

I have several fairy gardening books but, this is among one of my very favorites. The pictures and ideas are amazing. You can get lost in it's pages. It can really fire your imagination if you love to

garden and are into fairy gardens. Even if you don't garden it is very enjoyable just look through the pages and enjoy all the creativity of the makers. Each garden has a rhythm and symmetry expressed by each artist that designed it. This book would be great for anyone from children to people who still have a child that lives within them. This is a beautiful book filled with imagination and fun!

This is one of the two best books on Miniature Gardens. I just got into this hobby and I am really enjoying learning about it. This book is both visual and very informative.

I have been making mini gardens for several years, this book helped me take it to a new level.

There are more ideas with beautiful pictures than I can ever begin to describe. It covers it all.....and ideas you would never have thought about. I love this book. You won't be disappointed!

I am a visual learner, so my favorite thing about this book is that it has big, colorful photographs. You could easily glean dozens of ideas for miniature gardens, terrariums, and dish gardens without actually "reading" this book-- just by flipping through it. The processes used are explained in short step-by-step instructions that even a beginner could follow. My favorite garden described in the book is the underwater aerium, which has step-by-step instructions for making a "jellyfish" out of an air plant and a sea urchin shell. There is also a section of plant profiles to help you select the right kind of plants for a mini garden. This book along with the supplies to make one of the gardens would make the cutest gift.

Very informative, concise and extremely helpful in making my own miniature gardens. I really enjoyed the book and return to it often for new ideas. Highly recommended.

This book was comprehensive in its quest to help the beginner learn all the basics about design, plant choice, and various options for layout.

An absolute delight! Every page I turned only inspired me more! Just a few pages in and the winter blahs were forgotten. Now all I can think about is finding some funky containers to house my new gardens. Information, instructions, pictures, and examples, from start to finish it is all you need to know and see to create a work of living art! The "Underwater Aerium" using tillandsias on page 134 is my favorite but page 145 gives instructions on how to create a "Canning Jar Terrarium", so cute

and perfect for gift giving or an activity with kids and friends!
