From Them To Us: An International Study Of Inclusion In Education

Synopsis

Inclusive education has become a phrase with international currency shaping the content of conferences and national educational policies around the world. But what does it mean? Is it about including a special group of disabled learners or students seen to have 'special needs' (them) or is it concerned with making educational institutions inclusive, responsive to the diversity of all their students (us)? In this unique comparative study, the editors have brought together an international team of researchers from eight countries to develop case-studies which explore the processes of inclusion and exclusion within a school or group of schools set in its local and national context. The study includes classroom observation, the experiences of the school day of students and interviews with staff, students, parents and school governors. Through an innovative juxtaposition of the case-studies and commentaries on them, differences of perspective within and between countries are revealed and analysed. The study arose from a dissatisfaction with previous research, which presents 'national perspectives' or seeks findings that have global significance. This book avoids such simplification and draws attention to the problems of translation of practice across cultures. The editors start from an assumption of diversity of perspective which like the diversity of students within schools can be viewed as problematic or as a resource to be recognized and celebrated.

Customer Reviews

This book has one of the most interesting premises of any photography book I have had the pleasure to examine. Spouses, Helmut Newton and Alice Springs, share their photographic perspectives of each other, themselves, and the same models. These different views echo around in your mind to help you understand the personalities, purposes, and methods of two interesting photographers. In the process, you get a better understanding of the photography itself . . . and how it changes the models in our perception. By providing images over many decades, you also get a time-lapse view of a relationship and the aging process. Before going further, let me note that this volume contains many nude images of men and women that would be past the "R" rating if this book were a motion picture. The book has a few brief comments by Helmut Newton to set the stage. "The book shows the work of two photographers . . . [who] have lived together for fifty years." " . . . [B]ut neither is usually present at the other's photographic sittings." " . . . [N]either one has in any way influenced the other's way of approaching their subjects." "I can see the truth and simplicity in the portraits of Alice Springs." "[She has] been an actress and a painter before she has taken up the camera seriously if somewhat sporadically." "As for myself, I recognize the manipulation and editorialising in my photographs." Alice Springs looks for the core of the person, and captures the realities of daily life and aging very well. She shows you the joking and self-absorbed sides of Helmut Newton that help explain the stylized and challenging images that he is famous for producing.
