# Homemade Laundry Soap & Supplies: Easy DIY Household Recipes For Laundry Detergent, Fabric Softener, Stain Remover And Cleaning At A Fraction Of The Cost

## Synopsis

According to the U.S. Environmental Protection Agency, air quality inside many homes can be 2-5 times more polluted than the air just outside our homes. Traditional household cleaners play a huge factor in this pollution. Synthetic household products contain harmful chemicals that react with ozone from the air, creating toxins like formaldehyde. As an individual you have the power to control most of your choices and, therefore, the impact you create on the environment. Embracing a greener lifestyle isn't just about helping to preserve equatorial rain forests, it can also mean improving your health, padding your bank account, and, ultimately, improving your overall quality of life. For instance, Americans do a lot of laundry – about eight loads a week on average, using store-bought detergent adds up. If you'd rather save money, try making your own detergent – it's a fun, easy project, and your laundry will cost only pennies per load. So to sum up... non-toxic cleaners are perfectly safe around children, keep the air you breathe clean, are much, much cheaper and they don't harm the environment. Interested? Read on...What You Will Discover Inside Benefits of Homemade Detergents Powder vs Liquid Detergents Transition to Natural Living What's in conventional detergents? Can your detergents stand up to the test? 25 Homemade Detergents to try Would You Like To Know More? This book contains some great simple effective recipes to replace your current store bought detergents. The question is, will you choose to use them and save money and the environment at the same time? Or, will you just continue to do what is convenient and harmful in spite of what you have learned here! If you are ready to make a difference and Go Green! then scroll up and grab your copy of Homemade Laundry Soap & Supplies.

## Customer Reviews

I purchased this book and found this to be a very informative one. I went and found one for the fabric softener. I purchased vinegar and used the hair conditioner. I found that to be very useful in getting rid of the static that my work shirts have. I am going to use that for all my clothes. I am hoping that some day I can come across another book and find more hints to make more homemade stuff. I have used the one for making homemade (dry) laundry detergent. That smells good and does a pretty good job of cleaning the rags ( stuff used for cleaning the car and the house). If you are looking for a way of doing things a little more natural way then consider this book. I know you can get all the information on line but I wanted to have the book to be able to read anywhere. I love the book and was a good choice.

Love this book! I made one of the liquid laundry soap recipes and fabric softener and I absolutely love both!! I will never again buy laundry soap or fabric softener. I will make my own. My clothes smell much better (clean) and feel much better. One tip - when you make the laundry soap it tends to gel (this is normal). I found some residue on two shirts so each time I use it in my HE machine (yes it works in HE machines) I shake the jug first before adding it to the machine. This did the trick. The other idea I read is to mix the soap with water first. Enjoy and make your own soap! It SO much cheaper than buying laundry soap or fabric softener!! OH there are many recipes! Some dry, some liquid. Many fabric softeners too. Most of the stuff you need you can buy at a local walmart store!

Liked the ideas but tried dishwasher detergent; disappointed that it did not clean well (and we always pre-rinse). Stainless flatware turned very dull and developed water spots. Went back to using Cascade. Laundry detergent did okay on many items but not my husband's white socks and work clothes. Went back to Arm & Hammer. Homemade was worth a try for cost benefit but had to re-wash too many dishes and clothes! ^£

I would have given this a higher rating, because it has some great recipes, but the spelling is simply ATROCIOUS!!!!!! I recommend it, but just make sure you can read through the messy verbiage and

spelling.

There are many recipes or formulas in this book. Not all of them are for detergent. There are ideas for fabric softener and dryer sheets. The ingredients are very basic: borax, washing soda, and laundry bar. There are different things to add into the formulas though. I found this book to be very interesting..

I really like the recipes and information in this book. My biggest problem is actually in the table of Contents. Everything is 2 pages off so it's not as easy as it should be to find what you are looking for.

I love this book. I have read other books on how to make laundry soap. Well this one tops them all. It is easy to do. I have been making soap for over a year. I don't break out like the store bought soaps. I have so many allergies I have to be careful what I buy. This is the best book. I wish I had found this book years ago.

I thought I knew all that I needed to know about homemade laundry detergent. This book proved me wrong. It will take a while to use all of her ideas and find my favorites, but I am sure it will be worth the effort.
