Flammable: Environmental Suffering In An Argentine Shantytown

Synopsis

Surrounded by one of the largest petrochemical compounds in Argentina, a highly polluted river that brings the toxic waste of tanneries and other industries, a hazardous and largely unsupervised waste incinerator, and an unmonitored landfill, Flammable's soil, air, and water are contaminated with lead, chromium, benzene, and other chemicals. So are its nearly five thousand sickened and frail inhabitants. How do poor people make sense of and cope with toxic pollution? Why do they fail to understand what is objectively a clear and present danger? How are perceptions and misperceptions shared within a community? Based on archival research and two and a half years of collaborative ethnographic fieldwork in Flammable, this book examines the lived experiences of environmental suffering. Despite clear evidence to the contrary, residents allow themselves to doubt or even deny the hard facts of industrial pollution. This happens, the authors argue, through a "labor of confusion" enabled by state officials who frequently raise the issue of relocation and just as frequently suspend it; by the companies who fund local health care but assert that the area is unfit for human residence; by doctors who say the illnesses are no different from anywhere else but tell mothers they must leave the neighborhood if their families are to be cured; by journalists who randomly appear and focus on the most extreme aspects of life there; and by lawyers who encourage residents to hold out for a settlement. These contradictory actions, advice, and information work together to shape the confused experience of living in danger and ultimately translates into a long, ineffective, and uncertain waiting time, a time dictated by powerful interests and shared by all marginalized groups. With luminous and vivid descriptions of everyday life in the neighborhood, Auyero and Swistun depict this on-going slow motion human and environmental disaster and dissect the manifold ways in which it is experienced by Flammable residents.

Book Information

Paperback: 208 pages

Publisher: Oxford University Press; 1 edition (April 10, 2009)

Language: English

ISBN-10: 019537293X

Customer Reviews

A good look at Inflammable, but overall a fairly boring read. It was very slow reading and produced maybe 15 good points overall. I expected more.

Great ethnography! I would recommend. This book is great to discuss current international environmental and public health issues.

Required for a course. Not a very good read if you are interested in clarity or clear thinking. It is a bit silly.

Good read about the environment and the issues behind it
