Customer Reviews

Let me address 2 things here. Time and Calories, which seem to be issues in other reviews...First, calories: Calories for fruits and vegetables are all average. They are all nature made, so one may be sweeter than the other- we have all had one bitter strawberry and one really sweet one, right? The sweetness of these items fluctuate making the calories fluctuate. There is no "definite" caloric value for a fruit or vegetable! I have books that contradict caloric intake as well. It depends on the item

being tested and the ripeness and sweetness of that specific item on that particular day! I do agree they should have more nutritional value than just calories though...And as far as calories being high, you are eating a meal- they can't be much lower!! And it makes a difference if the calories come from fiber or from fat too...Second is time. Some of these are time consuming recipes. I made the carrot cake (my new favorite recipe) and it took a while to grate the carrots by hand, so I used a food processor which was phenomenal. You need to use your head sometimes to cut corners if you don't have a lot of time. Other than the desserts, the meals also can be time consuming, but some are fast. Just like any other cookbook! This book isn't titled "quick meals for lazy people" It is a book filled with healthy alternatives for people who like to eat! We are also not selling a movie, so who cares where the show airs! I personally love the show and the people on it. The book is also not a rip off of any other book- its the same concept and many books out there (not just hungry girl), but it's got different recipes.

As a fan of the Lifetime Series but a skeptical dieter, I wasn't sure whether the happy results on the show would be my own. Also, the economy sent me packing back to my parents' home for the year, and they are traditional, meat-and-potatoes and BUTTER eaters. My mother and I now take turns cooking, and also sometimes cook together. Would these recipes go over well in this household??YES!!!In fact, when my brother came home for a visit, I took my first crack at a recipe from the book: vegetable lasagna. I also made a "traditional" version, just in case. (My brother, in particular, can be a bit fussy.) To my enormous surprise, we all preferred the Cook Yourself Thin version!!I've now tried perhaps 6 or 8 recipes from this book (and also about as many from "Cook Yourself Thin Faster). I often like to prepare things that produce leftovers, like the lasagna, chicken pot pie (also spectacular), onion soup (I made a double recipe & then added the bread & cheese when reheating individual portions). For Mother's Day, I made the stuffed French Toast Sundaes, which went over as a "fancy delicacy" (I didn't mention that they were "healthy.")I understand some of the other comments that maybe these aren't the "lowest calorie" recipes out there, but I tried lots of those (Weight Watchers, Hungry Girl, etc.). For me, some just weren't as tasty as I'd like, or maybe the selections just weren't to my taste. Worse, I couldn't get into some of the recommended substitutes at Hungry Girl, or at some other sites. Some rely heavily on weird chemical food substitutes or fat-free dressings, etc. (Have you ever read the back of those packages? Processed corn this and chemical that! Yuck!
