Customer Reviews

This paper is vibrant, with a glossy, colored surface and a matte, white, back side. It is not perfectly square however, which is really a fatal flaw in origami paper. It is possible to fold simple shapes but anything remotely complicated requires something with more precise dimensions. I really like the colors and patterns but the imprecise measurements are a deal breaker. I will not purchase this product again.

I'm giving it two stars because the patterns are bright and pretty but the paper is difficult to fold and these are not exact squares so you cannot fold them corner to corner and have them work for even the most basic origami. Very frustrating, waste of money.

Paper is not square! Slightly off, which drives me nuts! Some of the patterns are really nice, but others are a bit much. I wouldn't buy again.

I have this paper in my cart. It says right on the package that it is single-sided, to answer another reviewer's question. I have other Tuttle origami paper, and it is all beautiful and high in quality. Get some! It folds easily and isn't too flimsy. Bright, modern patterns. No problems.

This paper is more like magazine type paper than typical origami paper that's extremely light and easy to fold. My eight year old loves doing origami and he has some trouble independently folding--items he makes somewhat sloppy because he has some difficulty folding. I gave this 3 stars because although the paper for origami/folding purposes works, there are better options out there. Would not purchase this paper again.

The patterns are vibrant and mostly beautiful. Some are a bit much. My real objection is the paper texture is not appealing. It is too thick, slick and not precisely cut, furthering the difficulty to work with it. Hard to get a nice, crisp fold. I won't buy it again. I recommend you look for Washi style Origami paper- it is far superior to this paper.

While the patterns are beautiful, the paper is not perfectly square - so when you fold two corners perfectly, the others do not line up. Being perfectly square is key when folding origami. Very disappointing.

This is a question. I am wanting more information on this item. I started to return it but I like the designs. My paper is not double sided. If it is really double sided I want the correct item but, if single sided is all there is I want to keep it and I want the description corrected. Is there anyone out there who can tell me what is what? I really want to give this paper a higher rating but will not unless the description matches the product.
