I ordered this for my mother who has been on a low-carb diet for several months and was having a hard time finding a good carb list. This book's details are very thorough - even restaurant listings. I ordered it used and the condition was just as described and it arrived very quickly.

This little book for counting carbohydrates is very thorough. It is arranged alphabetically which

makes all things easy to find and read. It is the best I have ever found. and it will fit in our purse. I would recommend it to all who are dieting and need the help of watching what we eat.

I have diabetes and this book is essential - so many items do not have the carbs marked (restaurants, fresh fruits & veggies). If you need to count carbs - this is the book to buy.

I am diabetic. I need to control my carbs because my sugar has not been under control. I really needed these books to help me keep carbs under control. I have always ordered from and been very happy with all purchases.

Well...I was looking for something that was organized by theme: vegetables, grains, etc. I already have a book that is inches thick organized the way this one is which is alphabetical. So, you go to broccoli under "B" and cauliflower under "C" and potatoes under "P" and etc. It does give the counts of brand names (the information you can just as easily find on the package). I find this way of organizing confusing and time-consuming.

This book is a complete copy of the Diabetes Counter. Both books have the exact same info in it. Very disappointed

Again, too many fast food joints. All people need is a good comprehensive carb counter listing portions of many foods. Yes, some of us go to those other places, yep. I had breakfast in one of them in 2012. But, otherwise I need info on real foods, condiments, flavorings etc. Doing the math keeps the brain active.

In a nutshell this book sucks. I'm a type one diabetic trying to learn how to count carbs and I couldn't even find baked potato in the listings. Three pages of potato B.S. but no baked potatoes or boiled potatoes? Are you kidding me? The same holds true for everything else I've tried to locate in this apparent fast food primer. Ultimate carb counter and nutrition experts my ass.
